## Unsurpassed Quality, Consistency and Variety

BI Nutraceuticals has been providing vitamins, minerals and specialty supplements to the food, nutritional supplement and veterinary industries since 1976. Our goal is to supply the same material from the same source time and time again. We maintain close contact with our suppliers, including site visits and supplier audits to further ensure the quality and consistency of our products. We also offer specialty grades of individual nutritional, as well as multiple-ingredient formulas to meet specific customer needs.

Sourcing and importing raw materials from

around the world is a complicated responsibility. For our customers' peace of mind, BI Nutraceuticals has instituted a vendor quality management system to ensure all materials meet strict specification standards and adhere to GMP and regulatory requirements. The program provides clear guidelines on specifications, tests methods and product quality to suppliers; regular audits of the manufacturing and lab facilities to assure compliance with GMP and GLP; random audits of traceability to assure usage of correct raw materials; random sampling and testing to ensure compliance with specifications; and oversight of the supplier's entire QA/QC program.
